ABSTRACT

A summary of data on adult basic education (ABE) is presented. The information was compiled from the annual program report submitted by each State or other area. The report is divided into two sections: (1) a review of ABE, for fiscal years 1967-1971; and (2) data for fiscal year 1971. (CK)

FOREWORD

This summary of data on adult basic education has been compiled from annual reports filed with the U.S. Office of Education by each State, the District of Columbia, and participating outlying areas. It is the fourth in a series of annual reports based upon the programs sponsored by Public Law 91-230, as amended.

Each report in the series presents statistics on adult basic education enrollments, student characteristics, completions, separations, teachers, classroom facilities, and inservice training. This publication includes 5 tables covering fiscal years 1967 through 1971 and 13 detailed tables on fiscal year 1971 programs (from July 1, 1970 through June 30, 1971).

Differing State laws on the collection of data prevented some States from reporting specific items; each table so affected shows the total enrollment, a nonclassified total, and a total of those enrollees whom the States could classify by specific category.

This publication was prepared by the Adult and Vocational Education Surveys Branch of the National Center for Educational Statistics with the cooperation of the Division of Adult Education Programs (DAEP) of the Bureau of Adult, Vocational, and Technical Education. Key to the development of this publication was the assistance of Paul V. Delker, Division Director of DAEP; Morris L. Brown, Chief, Adult Basic Education Branch; John D. Soileau and Arlon E. Sullivan, Education Program Specialists. The tables were prepared by Geneva C. Davis and typed by Elaine J. Price.

INTRODUCTION

The adult basic education program administered by the U.S. Office of Education was established under the Adult Education Act of 1966. This program offers to persons 16 years[1/] of age and older the opportunity to overcome English language difficulties and attain reading, writing, and computational skills through the eighth-grade level of competence.

Adult basic education programs are developed and operated by each of the 50 States, the District of Columbia, and outlying areas[2/] and are funded, in part, by grants from the U.S. Office of Education. The report is divided into two sections: (1) 5 years of data; (2) fiscal year 1971 data. The 5 years of data are shown to provide some historical perspective.

Each State or other area, with the exception of the Trust Territory of the Pacific Islands, must provide 10 percent of program costs and retain total responsibility for planning, supervisory services, teacher training, curriculum development, evaluation, and all essential services for enrollees through the eighth grade. In fiscal year 1971 each State, the District of Columbia, and five outlying areas conducted adult basic education programs.

The Office of Education also awards grants to schools, colleges, universities, and public and private nonprofit organizations for special projects and teacher-training projects. In some cases, the 1966 act authorizes direct contracts with institutions and organizations to develop new teacher-training techniques and special experimental and demonstration projects.

Data in this report were compiled from the annual program report submitted by each State or other area. Data are presented for the United States, for the regions utilized by the U.S. Office of Education, and for the States and outlying areas. This is the first report utilizing data based upon the 10 new U.S. Office of Education regions. As past data were based upon a different set of nine regions, regional comparisons with prior years were not attempted.

Although teacher training projects and special projects are part of the adult basic education program activities, data are not collected as a part of the annual report form. The information on these projects, mentioned in the narrative, was obtained from the approved grant awards.

1/ On June 30, 1969, the minimum age limitation was reduced from 18 to 16 years by the Vocational Education Amendments of 1968.

2/ The outlying areas include: American Samoa, Guam, Puerto Rico, the Trust Territory of the Pacific Islands, and the Virgin Islands.

Teacher-Training Projects

Fiscal year 1971 funds of $3,360,016 supported inservice and preservice training opportunities for 2,800 teachers, teacher-trainers, counselors, paraprofessionals, and administrators. Thirty-five training grants were awarded.

The primary objective of the national teacher-training projects was to provide the participants with current techniques and curriculums in teaching adult basic education students. Participants were involved in diverse kinds of institutes, including those designed for special population groups and for teaching English as a second language. Projects were also designed to improve the competencies of correctional administrators and teachers, and supervisors of adult curriculum specialists.

In addition to the personnel training provided by the national institutes, the Region IV Staff Development model provided 14,000 training opportunities in the form of on-campus and off-campus credit courses, summer institutes, consultant services, area workshops and State department of education inservice training. A substantial number of trainees participated in more than one training experience.

Special Projects

Forty-nine special experimental demonstration projects were awarded in fiscal year 1971 for a total of $6,638,861.

The major purpose of demonstration projects is to assist State agencies to conduct effective adult education programs by demonstrating innovative practices, systems, and materials on a pilot basis. Effective models and products were disseminated to State and local agencies for installation.

Public and private educational agencies, universities, and model cities agencies conducted special experimental demonstration projects in fiscal year 1971. Approximately 41,000 undereducated adults participated in the demonstration projects. Priorities included projects designed to serve isolated ethnic groups, to produce innovative curriculums and instructional materials, and to demonstrate comprehensive coordinated approaches to the delivery of adult basic education services.

National Advisory Council on Adult Education

The National Advisory Council on Adult Education was established under provisions of Public Law 91-230, as amended, title III of the Adult Education Act, section 310. The Council consists of 15 members, including a chairman and vice chairman, and operates through working committees.

The Council advises the Commissioner of Education on general regulations and policy in the administration of the adult education title. The Council also advises the U.S. Office of Education on policies and procedures governing the approval of State plans, insures the coordination of adult education programs under the title, and examines other programs offering adult education activities and services. The legislative charge to the Council includes a review of the administration and effectiveness of adult education programs sponsored by the title, recommendations, and an annual report to the President. In 1971, the Council developed eight national priorities which were incorporated in the Council's first annual report.

SECTION I

FIVE YEARS OF ADULT BASIC EDUCATION, FISCAL YEARS 1967-71

This section reviews adult basic education program statistics based upon data compiled from annual program reports for fiscal years 1967 through 1971. Tables 1 and 2, showing financial statistics and total number of persons enrolled, reflect actual figures reported. Percentage tables 3, 4 and 5 show annual enrollment distribution by sex, age, and race.

During this 5-year period, some $169 million in Federal funds were expended to provide adult basic education to approximately 2,855,826 enrollees.

Several States were unable to classify all adult basic education enrollees by specific categories. Only those enrollees classified by specific categories were used in determining the percentages for this section. Caution should be used in interpreting data over the 5-year period reported in this section. Data on race may be particularly affected by the large number of enrollees that States are unable to classify each year. Although percentages of nonclassified by race have been decreasing each year from 9.3 percent in 1969 to 7.4 percent in 1970 and 6.4 percent in 1971, they are still large enough to significantly affect trends if added to any existing category.

Based on the 5-year summarizations, a number of conclusions may be drawn about those being served nationally. State trends, however, may differ as a result of attempts to serve the needs of their residents.

The number of students reported as whites, excluding certain ethnic group members, comprised 54 percent of the adult basic education enrollment in 1971. This is the highest percentage ever enrolled.

Women enrolled in the program have since 1967 made up at least 53 percent of the total enrollment, with the percent fluctuating 2 to 4 points from year to year.

Programs offered in the last 5 years had increasingly higher enrollments in the 18-24 age group: from 18 percent of the total enrollment in 1967 to 30 percent in 1971. The 25-34 age group ranges from a high of 27 percent in 1970 to a low of 24 percent in 1967 and 26 percent the other 3 years. Persons 35-44, 45-54, and 55-64 constituted a smaller percentage of the enrollment each year. The 65-and-over age group remained relatively constant--3 or 4 percent.

SECTION II

ADULT BASIC EDUCATION, FISCAL YEAR 1971

Statistics in this section were obtained from the Adult Basic Education program report for fiscal year 1971. Each State files its program report annually with the U.S. Office of Education (USOE) through the appropriate USOE Regional Office. Tables 6 through 14 display fiscal year 1971 enrollments by sex, age, race, ethnic group, grade levels, completions, and separations. Tables 15 through 17 show the characteristics of adult basic education teachers and other personnel. Other aspects of the program are displayed in table 18.

Two States (Texas and California) each had over 57,000 enrolled in adult basic education programs during fiscal 1971. Another State (Florida) had some 44,000 enrolled, 2 States (Georgia and Illinois) had from 25,000 to 30,000, and 7 States and 1 outlying area had from 15,000 to 24,999. Twenty States and 1 outlying area had from 5,000 to 14,999 enrolled and the remaining 18 States, the District of Columbia, and 4 outlying areas had fewer than 5,000 enrolled. All States and outlying areas totaled almost 621,000 enrolled during fiscal year 1971, an increase of 85,000 or 15 percent over the previous year.

Table 6 displays selected categories of enrollment using the bases on which State data were reported. New enrollees represented 44 percent of the total and those completing the advanced level of instruction about 15 percent. Thirty-four percent were enrolled in a programed instruction type of curriculum and 12 percent were students housed in various types of institutions. The totals equal more than 100 percent since some persons fall into two or more categories.

Females represented 56 percent of the total enrollment in fiscal year 1971, 1 percent less than the all-time high reported in 1970. However, in 12 States, primarily in the north and east, there were more male than female enrollees (table 7).

The largest enrollment (188,403) came from the 18-24 age group, with enrollment decreasing as age increased (table 8). The 65 and older age group had only 18,011 enrolled. Although the report form uses 18-24 as the lowest age group, several States indicated that 16 year olds were included with this group. A combined age group of 18-34 year olds represents 57 percent of the total adult basic education enrollment, compared to 53 percent the previous year.

Since States were unable to classify 40,158 of the enrollees by race (table 9), this number, displayed as nonclassified, represents more than 6 percent of the total enrollment and could make a significant difference if classified with the 313,954 white students or the 203,243 Negro students. Table 10 classifies 119,225 of the 620,922 enrollees into three ethnic groups: Cubans, Mexican Americans, and Puerto Ricans.

The number of advanced (grades 7-8) level enrollees was higher than either the intermediate (grades 4-6) or the beginning (grades 1-3) levels in fiscal year 1971. The largest number of enrollees was at the beginning level in prior years (table 12). Since 40 percent of those who completed the advanced level and 35 percent of those who completed the intermediate level entered at a lower level, apparently a large group remains in the program for more than one level of training.

The 101,767 enrollees completing the advanced level of instruction is a 10 percent increase over the 92,293 for the previous year. Some of the increase may be the result of a decrease in separations from the program. In fiscal year 1971, only 118,937 separated for various reasons, compared to 180,661 the previous year; because of interpretation, separation totals may include some multiple counts (table 13). However, the number who separated for reasons of employment or to enter job training increased.

Student enrollment of 46,095 in adult basic education programs offered in correctional institutions is an increase of 13,559 over the previous year. Enrollment of 12,241 in the programs offered in hospitals is an increase of 2,670 over the previous year (table 14).

The 21,864 teachers for 620,922 students in fiscal year 1971 averages to 28.4 students per teacher (table 15). The 30,992 classes for this total enrollment averages 20 students per class, while the 14,886 classes for the 209,985 students enrolled in programmed instruction classes averages 14.11 students per class.

State and local staff in adult basic education programs increased over the previous year in the number of teachers, local supervisors and all other local level personnel (table 16). The decrease in the number of counselors, State administrators and supervisors, and other State personnel may have been caused by two States not reporting this data.

The number of teachers and other adult basic education personnel receiving training increased at the local level of administration over the previous year, while similar training at the State and Federal levels decreased (table 17).

Public school buildings again housed most of the adult basic education classes, 22,021, with the remaining 8,971 classes located in other types of buildings, such as churches, hospitals, correctional institutions and other community buildings (table 18).
